I have separated Convo Rain in the Bytes history from donations. Small but nifty alteration. Enjoy.

Thanks for the nice little feature drop.

I never knew QL'ing a convo message was a thing.

Also, there isn't a space between the hyphen and 'Flip Daily Wins'. Once seen, it cannot be unseen.

Spoiler ([Click to View](#))jk, I forget its there sometimes too.

Edit: Also, the i is capitalized in Win as well. So thats a two-in-one.

I really like this. Looking at mine there is 540 pages. I rain on others a lot. I would love a way to see how many total bytes I've rained. Would be an insane figure I'm sure.

Will be nice to see the additional function.

Now I just need a way to undo quicklove. Keep hitting quicklove on mobile... sometimes with my face at 2am...
