HF staff need to look into this service. Someone above accused OP of scamming, and he is yet to deny those allegations more than 24 hours later.

BTW just noticed the accuser is not contracted. Confused.

Be very careful when using this service looks like a big scam.

The website is highly vulnerable also.

The owner of the site registers the email, ip of the users, the user agent and the password in plain text.

He doesn't even reply the ticket of his users.

Following the structure of the columns inside the tables, clearly there is no membership in the backend code, it does not check if payments have arrived.

Something to keep in mind also that the payment addresses are static and he says "Automatic Payment".

Also hosting the website in Namesilo Shared Hosting lol.
