Thread: [Mobile phone intel services \(EU loc. tracking max 250m! & more\)](#)

Airbourne - May 19, 2023, 1:54 pm

All new to the market, HQ intel service for HQ clients.

Currently on sale under this category:

1. Location check of mobile phone (only Europe) (accuracy 50-250m depending on base tower) -> \$1000 - can reach higher numbers with high profile individuals, please reach out for a quote.
2. While we say "only Europe" we mean it geographically - that brexit fail does not affect services. Call history checks, approx location, vehicle plate checks and more available.
3. phone call history outgoing of phone number 1-5 months, including data, IP and location (entire world) (most numbers) -> 2.0k\$ - again, price can increase for high profile individuals. Please contact me for a quote.
4. Currently available US services: Location checks, phone checks, border checks, fbi check, criminal history, check owner of phone number. Please reach out for a quote

Satisfaction guaranteed or money back. Services will be expanded as time progresses and we see interest.

Most crypto currencies accepted except for BTC. With high profile orders we may require XMR.

Otherwise easily accepted:

LTC, ETH, USDT (on eth) , least likely BCH.

Shop soon to be established on Sellix. We are a newly established group aimed to provide the highest grade of service to the best available customers.

Vouch copies are UNAVAILABLE due to the nature of the service and pricepoint. High rep members are welcome to start a contract and pick a reputable ESCROW service.

I think 2k to see sms its crazy!

You can do that with a simple trojan.

Ghostwork - June 24, 2023, 5:27 am

Can you get incoming call history or outgoing SMS history?

Yes, its not a problem. We can get any data from all EU countries, somewhat in America and good in the rest of the world too. If you make a request you won't get just one month, you will get the full history for this request.

I would gladly offer my Middleman/Escrow services for this service if you're interested in discussing it [Airbourne](#) as I have experience in the data gathering/information gathering field. *Only saying this since you mentioned it in the OP.

Question: Are you planning on offering this for US clients in the future at all as well? Or are you planning on sticking just to Europe?

Interested in this service.

Does this need/require a Police Report/LE Subpoena?

Working in the UK?

GLWS.

Text messages require an amount of work that could be seen as a police report but it all stays in house. Its more risk for our contacts so its higher cost.

This works in the UK, 99% of Europe and some of Asia. US services are being worked on to be established properly. We are currently gathering all call history for a client as a vouch (since no one seems to trust out service otherwise) + we can easily get all info on someones vehicle plates in the UK.

I was planning on using your escrow services so im happy to see that you're fine with that as well :). We would be usually moving larger sums of money so hopefully thats not a problem. We want to be able to offer these services worldwide. It just so happens EU is easier with the contacts that we have, currently. I will check what we can do in the US rn.

Ah okay, then great! Great minds think alike what can I say.

OT: Definitely let me know when you have a US version of this service available, I'd love to test it out.

Is this service still available or available in the US?
