Can you run this: <https://mtihc.github.io/bustabit-script-simulator/>

With ~30.000 games?

Big Cash - May 20, 2023, 8:23 am

So what's the guarantee and stuff like that.

Chez_Yuki - May 20, 2023, 8:43 am

I am also interested in the test Hatty proposed. I'll see about buying it if you show us some solid evidence. Otherwise I can take a copy vouch, if you want a review.

Anyway good luck with your sales!

All Bustabit script sellers have been banned, see the list below:

They are all low rep / newly joined members.

These "private" scripts are all variations of leaked scripts throughout the years since 2016 (or earlier)

You are paying for leaked scripts and then gambling to lose money.

Please do your own research / be vigilant

As soon as SashaBeliy from the above dispute got banned for selling the Bustabit leaked script, this OP resurfaced to revive this thread to sell the same Bustabit script.

What are the chances they are not the same person?

Dev Null - July 21, 2023, 6:23 am

Not sure how you think this was anything related to me . Please don't post untruths sales trashing on my thread just because you assume I'm someone you "GUESS" I might be resembled to . Please show proof that's me before posting but it won't happen because I can prove my script is not that person's and my script is custom 100% MADE BY ME and is not sold and has never been sold on HF.

Thanks for the lols tho.

One last copy tonight for sale for \$30.

All other copies will strictly be \$75 a copy after my last discounted copy sold

When I opened an argument with Sasha, he bragged about scamming people multiple times on discord: <https://imgur.com/a/hpsu9T4>

It's his bread and butter, he must have a bot that creates HF accounts, I'm not saying it's him again, I'm saying there's a good chance it's him.

I can vouch for Dev Null if he send me the script to test it, so I'll check if it's the same or not.

Once tested and working, I'll send the price asked for it. That's my offer for the HF community.

Anyone with a brain should avoid buying this. OP is poor and sells low tier OSRS accounts for pennies. You're going to pay him to give you the formula to gamble? Surely not, right?

Lol, willing to Screenshare 1btc. In 12 months running my script . Watch youtube video explain that chart that auto clicks 8x per 10ms thru pages of profit. The username of my Bustabit acc should be sold for over 100 just so you can see my graph as its a gold mine. Yeah I've offered up cheaper items for sale because I don't gamble anymore.

I can prove however I'm not who you keep sales trashing my thread so please get facts straight before you run your little fingers on your wired keyboard

Stop. If you have a bitcoin it's not from constantly farming your bustabit gambling script. You grind on OSRS to sell accounts with 100h+ playtime for \$20. You have 30k to hold in volatile crypto but spend your time botting up accs for 100+ hours to sell for \$30. Good one buddy. Happy for you. Extremely. Convince anyone of this, please.

All these clowns selling bustabit scripts are just brokies preying on people who are unbelievably stupid, anyone who reads, stay away, it's for your own good.

At this point, your script is just about like any publicly leaked ones.

All yours would have is some minor redundant variations at best.

If you are so desperate to sell this script, find someone reputable with hundreds of completed contracts and give them a copy and get their review.

But we all know you won't do that because of the first sentence I wrote above.

Feel free to prove me wrong.

Roll this was a customly made script that has nothing to do with any of the trash you idiots have seen. Any real customers can contact me and watch it in action. Following your recommendation is how shit gets leaked in the first place.

Rastoko - September 11, 2023, 4:43 pm

All the scripts lose against the house edge, there's no such thing as money printer. You will x4-x5 your money if you are very lucky. But the odds of losing everything are equally high. Also from the video you showed it's a martingale script so I don't see why anyone would buy a public script, even if you added some kind of "don't bet for few rounds if 5 reds just came out" to avoid the red train, you can still lose. If you find 1 single script that can possibly triple the initial balance and be able to SURVIVE, 30-40 million rounds then you have something but this is IMPOSSIBLE based on the odds.

I am not trying to trash-sales but you advertise it like it's easy-profit thing when it's not.

You have more chances to double your money if you just all-in on 2x than using a script.

Not reading your post after you used the same incorrect term to describe my product which is "public script"

I don't care if even a few people buy this Script

All this product is my custom method that made me profits everyday for 8 months straight without

busting. This Script I still run on a daily basis and harvest my profits. I don't allow the Script to have enough bits to bust and lose all my profits and it still runs 24/7 to this day on my reps.

Thanks for your comment this Script is far from public

Rastoko - September 12, 2023, 12:04 pm

You are publicly lying.

I hope others won't fall into this trap. You don't "harvest" profits like it's a 100% win private method. You just gamble.

The odds of doubling your initial balance are 49.5%, same if you just bet all-in on 2x without wasting money buying scripts.

You are not the first who pretend you found the holy-grail of gambling, unfortunately not the last one too. If you did find a method that only makes you money you would expand the business by compounding the profits and re-invest. But instead of doing it, you are here trying to get few bucks from people.

ANOTHER LIE to mislead the people.

(Sep 12, 2023 06:48 AM)Dev Null Wrote: [\[CITE\]](#) All this product is my custom method that made me profits everyday for 8 months straight without busting.

8 months in bustabit is about 3 days at bustadice, same odds, same game. If you earned that much money you would just simply use the method at bustadice.com and make millions within a month.

You act like "it's long term" profit thing so people will fall to your trap/scam.

At least, stop lying.

It's common knowledge that all of the sellers advertising scripts like this are just scammers, hence no customers, apart from the gullible & stupid.

Such a shame.

8 months daily without busting once?

Time for you to update the pointless video in your main post.

Record starting from Bustabit's login page and start logging in (censor the username and whatever).

Have HF website ready on the next tab and alternate it back and forth showing this thread.

Then go back to Bustabit's website and navigate to your earning history graph and show the past 2 months earnings.

If you can't do this, don't bother replying.

If you can't do it, you have simply been lying about everything you have said so far.

So don't bother replying if you can't record the video.

No one would be interested in your redundant replies and the desperate attempt to sell a script "that never busted even once" on a gambling site.
