Thread: [Signatures and Custom Groups](#)

Omniscient - May 20, 2023, 10:15 am

This is a notice about a change.

Currently Regular non-upgraded members need 500 posts to have a signature display. If you upgrade then no minimum is required. However, if you join a custom group it was set to 100 posts for the signature to display. I have decided to alter this to 25 posts.

This should be a reasonable number. It's also a selling point for all group owners that by joining their group even as non-upgraded they can use signatures with 25 post minimum.

Thank you.

Not bad for new members.

Nice change.

Didn't even know being part of a group changes this number. Thanks.

25 does seem to be a reasonable number yes, especially since the minimum post count to PM someone is 25 posts. It's a number that makes sense.

I like this change. Incentivizes group joining + posting + activity.

25 is reasonable as fuck as well.

Where's my signature at?

I did not know that being a part of a group lowered the number.

Love the idea and it would help add more incentives to groups.

It'll be nice to see more Pink LSZ signatures around the forums.
