Thread: [Tech is OFFICIALLY BULLISH!!!!](#)

day trader - May 20, 2023, 12:18 pm

QQQ has finally broken the August 2022 high (334.42). Big investors are scattering to the major tech stocks pre-recession for "safety".

4H price action shows higher highs and higher lows consistently, which supports my analysis. But with that being said we are now in a bullish market so time to shoot to new highs in 2023 ? If anyone has comments on this, feel free to post them here.. would love to hear other traders' opinions.

Nostre - May 21, 2023, 4:42 am

Imagine how many short sellers had their Stop Losses placed on that high in August. We'll see what happens after it hits the 348.00 level.
