Thread: [Setting me up an IRC botnet](#)

Mr.Global - May 20, 2023, 5:56 pm

I'm getting back into things with a friend of mine.. I have a few questions for someone with recent experience in the botnet field particularly in IRC botnets..

1. Can you reccomend any good sites/places to buy a vps from thats offshore and allows botnets?
- 2.How big of a vps, like what are the specs id need for a botnet of atleast 5,000 bots?
- 3.Whats the best PUBLIC and PRIVATE IRC bot youve used, and why?

Thanks SO much in ADVANCE,

Mr. Global.

Gody - May 20, 2023, 7:15 pm

We are on 2023. Try Telegram Botnet !

I'd check out this forum for a VPS. There are quite a few: [Hosting Services](#)

Yes quit using IRC bots. Super out dated and theres nothing special about them anymore.

I spoke with OP and unfortunately he is very resistant to knowledge.

haha I love this

Going to use this from now on when I can

In short:

I told him that IRC botnets are obsolete, just like the whole IRC protocol.

He answered that he dont believe it and i must be wrong.

Some people are only able to learn the hard way.

Mr.Global - May 22, 2023, 4:11 pm

lols its funny how you guys seem to think its obsolete but [censored] was using a irc net 2-3 years ago. explain that one!

If this is what you want Blazin hosting for Dont go there bro.

Lost money.

Just my personal experience, I strongly suggest to read their TOS very carefully before sending money. Which is good advice for ANY provider, not just them.

99% of these bullet proof hosts on this site are full of shit. Find a Russian datacenter, find an older rack mount server for sale in Russia. Arrange for the newly purchased server to be shipped to the datacenter you found and pay your invoices. I wouldn't trust a single web host on here with ANY sensitive information.

Ideally how much would this cost?
