Thread: [#1 MENTORSHIP / TOOLS: Crack 20-30/Day RDP|SSH|VNC ##Very Cheap##](#)

SIM-3865436 - May 23, 2023, 9:11 am

Welcome to the perfect solution for cracking RDP, SSH, and VNC with our Customade tools! Our team of experienced professionals is dedicated to helping you reach your goals with our customized mentorship service. Our experts will provide you with personalized hands-on guidance and advice tailored to your individual needs. With our comprehensive tutorials and step-by-step instructions, you will be able to easily crack these secure protocols with the most effective and efficient tools and techniques. So take the first step towards achieving success today and get the help you need with our premium mentorship service!

In this course, you will be taught various advanced methods of downloading and filtering your results with Shodan, using a commandline key, custom python tools port scanner, and stealth brute. With the purchase of the mentorship, you will have access to all the available tools - these are cross-platform and can be installed on any device running Python. We are willing to mentor you until you successfully gain the knowledge required to crack your first set of protocols. Our team will provide you with the instructions that will help you understand the basics of scanning (such as filtering, scanning, etc.) and nurture you until you become a master in Shodan. We will then guide you through the more complex tasks (such as identifying a vulnerable port, or leveraging it for attack) so that you can protect your networks from any kind of threats. By the end of the course, you will be able to understand the threats faced on the internet and develop proper security measures to protect your data. This successful hit could benefit you greatly and bring endless profits, which I won't go into detail here. This can help with reconnaissance and exploitation of servers.

This can be done in two ways: Firstly, a set price for mentorship and secondly, the purchase of tools if needed.

Ghost scanner [\(Click to View\)](#)

Ghost-scanner [\(Click to View\)](#)

Brute [\(Click to View\)](#)

Shodan [\(Click to View\)](#)

Price: For mentorship - \$250
For tools - \$150 (includind shodan key)

Q&A

Q: Why should I buy from you instead of using one of the many open source options on GitHub?

A: Most of the open source tools are not regularly updated and it is often difficult to find the owner who can provide support when you encounter an issue. By buying from me, you can be assured of regular updates and help whenever you need it.

Q: What is the duration for mastery of this process?

A: Depending on how quickly you learn, you should be able to start making progress after our session.

Q: Why don't you just open an RDP store?

A: I have other commitments and projects that I will soon be releasing to the public.

Q: Do I need to know Python programming language?

A: Not necessarily, the process is fairly straightforward.

Q: Will you be updating the tools?

A: Yes, I will be regularly updating the tools and adding new features as requested.

NOTE: I'm offering a discount to the first 3 customers of their choice on any package. No vouch copies will be issued. It will be limited to 10 sales so can handle support perfectly.

Terms of Service:

- I will not be responsible for what you do with the knowledge or tools provided.
- No leaking of my source code is allowed; if it is noticed, I will not send any updates your way.
- If you are not able to crack any protocol, you will receive a full refund.
- No sales trashing is allowed; if you have an issue with me, please come directly to me.
- These terms can be changed at any time.
