For what? Taxes? Tax season is over.

Step 1: Hire a CPA

Step 2: Give them all your financial info

Step 3: Pay them money

Step 4: Review and sign the paperwork to confirm you agree with what they are filing on your behalf.

Considering you have given no details as to what your tax situation is, it's really impossible to say what you need to do other than consult a professional.

i assume its business tax? because personal taxes the deadline was a month ago. If its business i would probably hire a professional.

You know you can just google, "how to file your taxes with the IRS," and there's legit thousands of guides, articles, tutorials, etc. right?
