QuarkDev - May 28, 2023, 10:36 am

QUARK DRAINER

This will take away all the headaches of lack of money

PRICE : \$5 000

"\$5K" ([Click to View](#))

What you get when you buy for a "huge" \$5 000

- + All sources of QuarkDrainer (backend, frontend, smart contract)
- + Instructions on how to install and get started.
- + Invitation to the closed community who bought [tooltip=615]drainer[/tooltip]
- + Author's manuals and articles on how to work with the drainer, traffic (5 pcs)
- + Technical support
- + Regular developments, the fastest innovations of new features (free)
- + - Maybe I'll give you a Thai massage.

CREDIT : \$2 000

"\$2K" ([Click to View](#))

I guess since you're looking at the option that clearly you have not worked with drainers earlier, otherwise for you would be \$5k would not be a problem.

And so you buy the script on credit ? \$2k down payment ?

I put the backend on my server (I give you the obfuscated frontend so you can put it on your domain and webhosting)

All the assets will go into your wallet that you give me > as soon as we see that it has \$3 000 extra for the script and you get the entire kit, which is listed above when you buy for \$5 000.

So to this point you will not have the source / manuals, schemes / community, etc. only discussed frontend.

MONTH : \$100

"BYTE FOR \$100" ([Click to View](#))

What's the purpose of this since you're not poor?

It's motivation for development. Searching for any new vulnerabilities and private implementations in the drainer functionality so that it would always remain truly #1 on the market.

Just based on the material I provide, not only will \$100 seem like a "formality" to you. So you can still net it the same day and pay off \$5K ?

QUARK DRAINER - Without a doubt No1 drainer. Here you do not go to a lottery, I hope the functionality and materials all clear without unnecessary water in this port. So here's a little bit about me, I've been coding for 6 years, 2 years since I quit working for the shops and went gray ? my base is ES6, Git, MongoDB, DOM, AJAX, jQuery, Javascript + React, Material UI, Single Page Application. When I was getting about \$1750-2000/month, one scammer found me on github and asked to do some web3 development (it was the first drainer with the simplest functionality), he paid me \$3000 for 2.5 weeks of work since it was my first experience and it was really boring to look at web3 libraries. After that, I had a thought as 1 person without knowledge in the right area and portfolio - paid such money. From that moment I had no problems with \$ for any of my fantasies and needs. And now you see the ideal product and community in which you will be happy. If you're interested - the door is open ?

"Which wallets does QuarkDrainer interact with?" ([Click to View](#))

Optimization for all devices

Metamask, TrustWallet, Coinbase Wallet, Binance Wallet, Wallet Connect ~300 wallets (explorer.walletconnect.com)

"Asset Withdrawal Methods" ([Click to View](#))

> Transfer

> Seaport 1.5 (withdraws all approved Opensea assets in one click)

> SetApprovalForAll (gets NFT collection in one click)

> Signature Message (gets assets with a signature)

> Metamask private fix (no token count, no token name, NOTHING - just a button without red plates)

> Approve (Automatic withdrawal of assets after approve confirmation)

> Permit + 2.0 (One-click withdrawal of tokens confirmed by Uniswap + Permit 1)

> Smart contract (Removing the native "main network coin" with any Airdrop/Claim/Reward/Swap/Router/Withdraw/Your Creative...)

- > NFT ERC 721/1155
- > BLUR, X2Y2 (Gets all approved assets in 1 click)
- > Moonbirds, Sushiswap, Uniswap, PancakeSwap

"In what networks does the drainer work?" ([Click to View](#))

It works on ALL 0x networks you can find the networks you need here: chainlist.org

Configured for Ethereum (ETH), Binance Smart Chain (BNB), Polygon (MATIC), Avalanche (AVAX), Arbitrum One (ARB), Optimism, Fantom Opera (FTM).

On request we will enable or disable networks you need.

"Why Quark Drainer?" ([Click to View](#))

- > 5 author articles (on working with drainer, traffic basics, tricks and creatives)
- > 5 frontend custom builds (5 creatives you can use as a basis for your own custom builds)
- > Complete tracking of victims' actions on Telegram bot
- > Advanced developments - we are always the first and the best in implementing new methods and vulnerabilities for asset write-offs.
- > Parsing assets and withdrawal priority
- > Automatic withdrawals of any assets to your wallet once approved
- > Forget about red signs or inscriptions and stuff - always be with the top-of-the-line fixes
- > Backend is hosted on a VPS (server), you can put Frontend on any webhosting
- > Next JS programming language, source clean code (any testing)
- > Buying not from resellers/merchants, from developer directly straight from the oven
- > Technical support - I answer any stupid and absurd questions (mostly online)
- > Author's articles - sharing my experience in traffic, schemes and personal practice with the "money" button
- > A community - a closed chat room for everyone who has bought Drainer.
- > Any kind of private unique development for your needs (we discuss for extra charge)
- > Ready-made websites and a lot of goodies.
- > "Lifetime Warranty" - sounds bad, but it is. 100\$ per month from all buyers as a subscription, so we don't quit development, innovations, fixes.

> What else do you need?

According to my observations, the scripts on the market are crap (what else would a dev write showing his product)

I'm "shocked" by what they sell for \$ 350-1500 on boards, while in cryptoscam monthly turnover is a 6-7 digit for each team, for me it's laughter apparently all who buy such products can not make some 10k to get out of good script for a month. Resell scripts, sell public crap or pieces of code. DAMN if you think \$5 000 is expensive and ask me to sell for \$1 000 - do not write me please, otherwise I will have to insult you very much. Since you probably didn't ever work with drainer - if you don't have couple of btcs in your crypto wallet... Thanks for your time I hope you experienced at least some emotions reading my topic

Swiftteryl - May 28, 2023, 11:34 am

hey buddy is this legit

QuarkDev - May 29, 2023, 8:47 pm

Mate if you need areliable powerful drainer DM me your TOX/Jabber or check the tg group. Once you purchase ill add you to our group of the drainer where other clients share their results and exp

QuarkDev - June 10, 2023, 12:11 pm

Update! Seaport 1.5

Also + 2 sales on hackforums ;)

QuarkDev - June 16, 2023, 5:27 pm

1 more!

Thanks all. Community is growing ?

BlackMafiA - July 29, 2023, 1:06 pm

Any reviews?

I am curious

MTVTV - July 31, 2023, 2:58 am

The price is really very affordable for the options it has. We need detailed reviews if possible?
Thanks?

Emeraldd - July 31, 2023, 11:04 am

I would like to discuss all this over tg could you please PM me your TG?

MainZilla - August 16, 2023, 8:38 pm

Been looking for a good drainer on the forums for a long time and came across this one. The price seemed clear, cheaper such scripts to sell impossible, all that bought cheaper - a complete slag. And community guys - it's priceless. Registered only to thank the developer!

dumpinc - October 31, 2023, 1:02 pm

The best one. I've tried so many drainers so far. All those on github are useless and with backdoors, couldnt even get anything good from their code. Finally I found this! GG

mu00 - November 5, 2023, 11:02 pm

A scammer scam me 3k from telegram
