appearance

I imagine aliens as invisible particles infinitely smaller than a human being, they have detached themselves from biological life as we know it. These are self-sufficient and function thanks to electrical impulses in their bodies which provide them with a capacity for reasoning and calculation enormously greater than that of humans. Obviously these organisms have detached themselves from both animal and plant life, as they are fragile and susceptible to disease and damage.

DashPHP - May 30, 2023, 12:28 am

A collection of all the aliens I've seen in movies

{ RadioActive Hack } - May 30, 2023, 2:21 am

Modern day Nicole Kidman. If she isn't an alien, I don't know what is.

You should look up jordan barret, Margo millien to get the real definition of alien look.

No Krall and his soldiers where they destroyed some ship. Maybe it was Star trek beyond or some other movie very similar.

thats how i imagine intelligent aliens

Piplup - May 30, 2023, 10:26 pm

I always think of those fuckers from <https://www.alienaa.com/> (niche neopets-like alien game for roudy preteens)

Chickencheeto - May 31, 2023, 7:27 am

Worms bugs fish.... Dinosaurs. Not little green men.

Timeless - June 1, 2023, 1:03 pm

I think they are about the same as humans

ballzinmouth - June 1, 2023, 1:08 pm

A very intelligent thing mate

Undead - June 1, 2023, 1:10 pm

Hairless and genderless without any private parts.

I wanna see how you look now

CrimsonLanternfly - June 2, 2023, 10:40 pm

Whats to keep them from looking like us?

Blogger - June 10, 2023, 9:00 pm

Have you ever seen Roswell(the television series)? That's how I would imagine them.

CocaColax - June 11, 2023, 6:40 am

They have no form or shape... most close to aliens will be vibrations and frequency.

ChickenSoupFortuneTeller - June 12, 2023, 9:54 am

I would like to imagine they are all copies of that blob alien from monsters vs aliens. Especially with his sence of humor :)

Mercury - June 12, 2023, 3:19 pm

I go straight to xenomorph honestly. I love those movies so it's the first that comes to mind.

pms - June 12, 2023, 5:13 pm

Green head and tall bodies, kinda like that.

goregasmic - June 14, 2023, 5:53 am

i just can't imagine them other way than these grey creatures they show in the movies

Me too! Maybe the weirdos walking around are the aliens...

TheWorm - June 14, 2023, 11:40 pm

They all look like Roger from the TV show American Dad. Everyone knows that! :)

B3A - June 15, 2023, 4:02 am

green big head and black eyes. seen them in movies man

Captain Hook - June 15, 2023, 8:16 am

Ahh. Aliens. Or, universal creatures, as I call them. They are all different, everywhere, though all created by the same God. Though, God may be different through different places. We cannot know that. But here, there are what we call humans, and they are all great.

SIM-5320087 - June 16, 2023, 3:19 pm

cute adorable little creatures with antennas that wiggle with excitement

bambizzilikescheese - June 17, 2023, 2:35 am

Those tall green things with oblong heads, like 10 feet tall and massive black eyes

ChronoBiff - August 3, 2023, 8:00 pm

It has to be a very light, floating being. I don't think it will be anything close to what a human looks like, but i also am not convinced they will be glowing green. I guess we'll never know..... or will we?!

V?rt - August 3, 2023, 8:12 pm

I would think they probably look pretty similar to humans. Nobody said they have to look different. If they don't look like humans, I think they look like Jellyfish.

db212021 - August 5, 2023, 6:22 am

For me, I always think of them as non-carbon-based collections of light that evolved with some kind of fusing of intelligence. I know it's highly improbable, but for some reason, I believe that this is the only way a being could travel amongst the universe without massive repercussions.

mrjdhdj - January 12, 2025, 12:31 pm

Little green men probably about 4ft tall big heads spindly bodies. I would assume because of their

atmosphere and amount of gravity.

ExodusX - January 16, 2025, 5:34 pm

Definitely very tall beings with big head diamond shaped and black cat shaped eyes, long fingers like wooden sticks and green or gray skin.

Elguardigo - February 5, 2025, 7:45 pm

They probably look like humans, or very close to it

x e D - February 28, 2025, 12:38 am

These guys are saying they summon the craft for contact

I think when it's time to collect the resources, they come to earth. I firmly believe they worked closely with the Egyptians

ariluvs - May 18, 2025, 8:29 pm

honestly i imagine aliens to look just like us. yall could be aliens right now and trying to fool us

ariluvs - June 15, 2025, 12:55 pm

like any normal person and like the cartoons

Sam - June 15, 2025, 1:39 pm

I imagine them to be like the ones out of the movie Arrival. Solid fucking movie btw.

ro0ti - June 15, 2025, 3:51 pm

I picture aliens somewhat like this:

I do believe that we humans are the aliens, as there is no other species like ours. If evolution were true, we would see signs of an evolutionary loop such as monkeys with human arms or something equally strange.

Essentially, I think that at the "beginning," those strange creatures depicted in the pyramids were trying to tell us that we flew here and invaded this planet, as we are a mating species.

Of course, I also believe there are other life forms in the galaxy either because we exist alongside them, or because we are in a simulation created by a far higher intelligence.

This is just my opinion! ?
