1# 2000 SMS per day, 1 weeks access | 300\$ / SOLD OUT

2# 3000 SMS per day, 1 weeks access | 450\$

3# 4000 SMS per day, 1 weeks access | 500\$

4# 10000 SMS per day, 1 weeks access | 650\$

Monthly.

1# 2000 SMS per day, 1 month access | 500\$

2# 3000 SMS per day, 1 month access | 650\$

3# 4000 SMS per day, 1 month access | 700\$

4# 10000 SMS per day, 1 month access | 850\$

Custom plans are available on request.

After payment u get only HTTP API access.

Spoiler ([Click to View](#))

HTTP API ACCESS EXAMPLE:

Code `https://domain.com/api?=<TOKEN>+<FROM`

`NAME>+<MESSAGE>+<NUMBER,NUMBER,NUMBER,NUMBER>`

`<TOKEN> = "15 digit secret key"`

`<FROM NAME> = "Sender ID"`

`<MESSAGE> = "Message content"`

`<NUMBER> = "Receiver Phone number"`

How to send messages ?

Spoiler ([Click to View](#))

Change data from url below and execute it on browser.

Code `https://domain.com/api?=<TOKEN>+<FROM`

`NAME>+<MESSAGE>+<NUMBER,NUMBER,NUMBER,NUMBER>`

Is it possible to send 1000 messages using one request ?

Spoiler ([Click to View](#))

Yes, you can do it easy with .bat script.

Code `@echo off`

`setlocal enabledelayedexpansion`

REM Set the paths to the .txt files containing the variables

```
set "token_file=token.txt"
```

```
set "from_name_file=from_name.txt"
```

```
set "message_file=message.txt"
```

```
set "numbers_file=numbers.txt"
```

REM Read the variables from the files

```
set /p "token=" < "%token_file%"
```

```
set /p "from_name=" < "%from_name_file%"
```

```
set /p "message=" < "%message_file%"
```

```
set /p "numbers=" < "%numbers_file%"
```

REM Construct the URL

```
set "url=https://domain.com/api?=%token%+%from_name%+%message%+%numbers%"
```

REM Display the constructed URL

```
echo %url%
```

endlocal

Save this script as spoof.bat

Create .txt files inside same folder.

1. token.txt

2. from_name.txt

3. message.txt

4. numbers.txt

numbers.txt example:

+4400000000,+4400000000,+4400000000,+4400000000,+4400000000,

+4400000000,+4400000000,+4400000000,+4400000000,+4400000000,

+4400000000,+4400000000,+4400000000,+4400000000,+4400000000,

+4400000000,+4400000000,+4400000000,+4400000000,+4400000000,

And execute. bat script.

After that, a messages will be sent to all numbers listed in the numbers.txt file.

How do I send a spoofed message for free?

Spoiler ([Click to View](#))

Leave a post on the thread with the filled-out form example below. [COPY/PASTE]

Code SMS Spoof Request.

1.From Sender ID = ""

2.Target Number = ""

3.Message Content = ""

We send out free requests every 24 hours. Thanks.
