What is eWhoring?

You are ultimately going to be taking the identity of someone else, too talk with and extract money from, gullible individuals. This is effectively a more advanced form of catfishing and a lesser version of fraud and identity theft. EWhoring exists in a gray area in that no one will waste the time and effort to come after you, but you still don't want to tell mom how you got your money.

What is an example of an eWhore?

Imagine someone creating the identity of a beautiful blond name Tiffany. This person, under the guise of Tiffany, will look for people to talk to on places like dating apps, social media, chatrooms, or other forums. Once they find someone who seems interested in their Tiffany persona, they will do their best to try and get that person to pay for some service or good. That can include sexting, pictures, videos, or even meetup scams. Tiffany will then either provide the service or good in exchange for money or not provide anything and just take the money. This process is repeated as often as possible until the person catches on or there is nothing left to give from either side.

What do I need to start eWhoring?

To do the above you will need a few items to begin.

- Images and videos of the person your intent to be, otherwise called a pack.
- Platforms to acquire potential people.
- Ways to accept payments.
- Social Engineering skills to convince people.

Does eWhoring make money still?

Depending on where you find people you can make a substantial amount of money. The lesser known or more lucrative areas could net you thousands a week. The very popular and low quality areas could net you hundreds a week.

Neksi stop lurking. This is just a small snippet of what you might need to start making good money online. If you have any questions or want a further breakdown just let me know.
