I have a sample database you can view in real time prior to purchasing, so you know what you're buying. Ability to search for 33 Different Countries, ability to search via email, company names, or key words / terms. Ability to search by ZIP Code of the company aswell. (or best known zip code) . Also offering private / personal emails like google yahoo etc.. but those cannot be seperated by zip code.

I can update these daily, and have a lot more that I have yet to upload to my database, just seeing how sales go. Im flexible.

If you want to see what I have / window show, you're more than welcome to I have a searchable database of records for you to preview and to verify im not selling junk. No need for vouches as I will provide 100% proof and access to the database prior if you need it.

I'll do the 1st few sales at x2 of the above rate. 10\$ for 2000 emails, 20\$ for 2000 company emails, 30\$ for 1000 targeted emails (you search you pick)

start a contact and then lets get to a quick tour before you purchase, ill Mae sure your satisfied before you even buy it.
