Thread: [Game Recommendation](#)

LeProHack - June 3, 2023, 12:32 pm

Yooo anyone knows any similar games to like Software Inc. or Game Dev Tycoon/Mad Games?

Any game that involves company management really.

Cheers :)

Maybe check out "Going Medieval" or "Let's Build a Zoo".

Seems to be games you'd probably like from what I'm reading.

I think the only Tycoon games I'm familiar with or off the top of my head at least are of the roller coaster variety haha. I figure that's not exactly what you're looking for of course lol, but it's what your post got me thinking of at least. Old asf games, but also great ones that I put who knows how many hours into as a kid. Hell I even still occasionally get the itch to play them nowadays. Just super chill as well as cool to build up and oversee something like a theme park.
