Thread: [I'm Aaron](#)

Chaos55 - June 4, 2023, 1:39 pm

Hi, my name's aaron. and I need some help with a problem

Sand Ferret - June 4, 2023, 1:40 pm

Well don't keep everyone in suspense.

Chaos55 - June 4, 2023, 1:44 pm

Lol... Okay, I need help after a factory reset of my AT&t LG Phoenix 4

webdev77 - June 4, 2023, 1:46 pm

You already made a thread for that.

Sand Ferret - June 4, 2023, 1:46 pm

Just bin it and get an iPhone.

webdev77 - June 4, 2023, 1:47 pm

(Jun 4, 2023 01:46 PM)Sand Ferret Wrote: [\[CITE\]](#) Just bin it and get an iPhone.

I'll bin my android device for an iPhone if that's a trade offer. ?

Chaos55 - June 4, 2023, 1:47 pm

I'm REALLY new to this. I just need to gat back into my phone. I fight wars for a living; I don't know I. T.

I don't have time 2 surf for iPhones.

Toffee - June 4, 2023, 2:12 pm

Welcome to Hack forums, enjoy your stay

Chaos55 - June 4, 2023, 2:36 pm

Thank you but I'm still having problems

Deany - June 4, 2023, 6:02 pm

Well damn. Good to hear. Congratulations.

Chaos55 - June 11, 2023, 10:00 am

Absolutely NOT!!! I'm not a big Apple guy

Dread.Reaper - June 11, 2023, 10:13 am

Start by turning off your LG Phoenix 4 completely.

Press and hold the Power button and Volume Down button simultaneously until the LG logo appears on the screen. Then release both buttons.

Quickly press and hold the Power button and Volume Down button again until the Factory data reset screen appears. Release the buttons.

On the Factory data reset screen, you can use the Volume buttons to navigate and the Power button to confirm your selection.

Scroll down to "Yes" using the Volume Down button and press the Power button to confirm.

The factory reset process will begin, and your device will restart.

Once the reset is complete, you will be prompted to set up your LG Phoenix 4 as if it were brand new.

No one could have asked GPT for him? Really?

Omniscient - June 11, 2023, 11:26 am

My experience with LG phones is they brick easily. I stopped buying them after the 3rd one died.

If you have Android Dev mode enable you can try to hook it up to a PC.

Chaos55 - June 11, 2023, 3:07 pm

Thank you. But I've remedied that situation. Now, ive got another problem. It's a Union Supply Tablet the Utab7. It won't go past the first screen. It just freezes

LMFAOOOOOOOOOO

BROTHER IN CHRIST. THIS IS NOT A PHONE RESET FORUM.

?{ RadioActive Hack }? - June 11, 2023, 9:06 pm

Have you tried turning it off and back on again?

Dread.Reaper - June 12, 2023, 7:13 am

Give this a shot. Perform a soft reset: Press and hold the power button for about 10-15 seconds until the device powers off. Then release the button and try turning it on again.

Charge the tablet: Ensure that your tablet has enough battery power by connecting it to a power source and letting it charge for at least 30 minutes. Sometimes, a low battery level can cause booting issues.

Try a hard reset: If the soft reset didn't work, you can try performing a hard reset. The process may vary depending on your tablet's specific model, but typically, you can press and hold a combination of buttons (e.g., power button + volume up/down) to access the recovery mode. Once in recovery mode, use the volume buttons to navigate and the power button to select the "Factory Reset" or "Wipe Data/Factory Reset" option. This will erase all data on your tablet, so make sure you have backups if needed.

Hey thanks, Bud... Not really my area of expertise... I appreciate you.

Another query, though.

For a month you've had this phone hidden while in jail all while it's not working for you?
