Hi all

I offer Investment opportunity in my private project that I started from 2018 Which has grown to achieve impressive profits so far

The project is legal and has no problems.

The investment amount 15k and only one spot, And its lifetime investment.

You will get is 45 percent of the project and the profit, and that will be about \$350~\$400 every 35~45 day

The profit will be sent to you via PayPal as friend option or " goods option as you prefer".

The reason I'm selling 45 percent is because I need the cash.

If you really interested and you need know more details you can PM "Please do not wasting my time if you not interested or you don't have the Money"

You'll probably need to clarify why a private project you started that has grown to achieve impressive profits has left you needing the cash.

To be fair, i don't find \$300-\$400 every 4-5 weeks impressive... not at all, and he's asking 15k.. if someone is stupid enough to give him 15k for that, he will have 43 months payment at once.

That's 3 and half years income for him, at once.
