? HOW TO TRACK EXACT LOCATION OF VICTIM | HQ METHOD ?

HEY THERE

I AM WITH AN ANOTHER TUTORIAL , IN THIS TUTORIAL I WILL SHOW YOU HOW YOU CAN GET EXACT LOCATION OF VICTIM

IN THIS TUTORIAL WE WILL USE SOCIAL ENGINEERING

THE TOOL WE WILL BE USING IS HIDDEN EYE ( NOT FOR PHISHING )

? TO INSTALL HIDDEN EYE IN TERMUX

? apt install git

? apt install python php curl openssh grep

? git clone -b Termux-Support-Branch

<https://github.com/DarkSecDevelopers/HiddenEye.git>

? cd HiddenEye

? python HiddenEye.py

? AFTER THAT YOU WILL SHOW MANY OPTION OF PHISHING WEBSITES

? AT LAST YOU WILL SEE A OPTION "get victims location"

? SELECT THAT OPTION

? AFTER SELECTING THE OPTION SELECT 2ND OPTION ( GDRIVE OPTION )

? AFTER THAT PRESS ENTER (YOU WILL SEE SOME TIOS IGNORE THIS )

? TYPE N WHEN IT ASKS FOR KEYLOGGER

? AFTER THAT PUT ANY GDRIVE LINK (ANY)

? AFTER THAT ENTER PORT , IN THIS I AM USING 1275

? AFTER THAT IT YOU HAVE TO TURN ON HOTSPOT AND SELECT NGROK IN SERVER (FIRST ENABLE HOTSPOT AND THEN SELECT NGROK)

? AFTER THAT SEND THE GENERATED LINK TO VICTIM ( HERE COMES SOCIAL ENGINEERING )

? WHEN VICTIM CLICKS ON THE LINK YOU WILL GET HIS LOCATION ON TERMUX COPY THE GOOGLE MAP LINK AND PASTEIT IN GOOGLE .

\$ BOOM YOU GOT THE LOCATION OF VICTIM \$

Thank you.

However, what is the difference related to a common Web IPv4 Grabber?

I'm asking the above question because I never used HiddenEye. I was aware of it, anyway.

Basically, without the GPS location confirmation (If available inside the device) you can only trace the IPv4 provider physical cabinet position.

In the latter event, there couldn't be any output difference between an usual IPv4 logger; and all the differentially coded scripts. It's deductive.

Moreover, for example: IPLOGGER@ORG | It has much more S.E. advanced features than a clear NGROK Server-side proposition. Another good try might be: The Social-Engineer Toolkit (SET) | Despite not being updated from a long time, it should be another effective and functioning tool.

Hope it helped.

Good luck, best regards.
