IF it's not 2FA then its possible, but requires a bit of information on the person.

Anyone need help add me as a comade on HF

It's honestly not difficult in many cases. You need to first find the associated email, and then use a database site to find the password. You'll probably only be successful on 1/20 on that, and then Snapchat seems to randomly prompt for suspicious login on some accounts while letting you into others. I'd say that's a 2/5 ratio there.

I haven't quite figured out what prompts suspicious logins.

I haven't. I asked as well and got a PM from a guy who talked a big game but then wanted half payment up front before even proving he was in the account.

All I was hoping for is someone who could both do it, and would be interested in teaching so I could use it for my own personal interests.

Someone here says their can bypass sus login. Check the forums. I need to figure out how to find the email associated with a snap ?
