Thread: [What is the best loader/botnet/RAT to hold bots? That has powershell with return](#)

Captain Hook - June 16, 2023, 3:31 pm

I need something I can send powershell individually to bots. And see the return output it gives.

Can anyone recommend me anything? Any C2? Anything?

Or what can I start to customize to make my own with Chat GPT? What sources? Let me know!

Dread.Reaper - June 16, 2023, 4:29 pm

Lol, I coded thos exact thing with a PHP interface.

Please sir, I promise you tremendous reward in the future if you give it to me and it's suitable for me to even customize, or if it's perfect, even better, let me, I beg of you!

Show me your panel, infadel.

Lucidif3r - June 18, 2023, 8:48 am

Lmao oh boy he called you infadel ?

<https://prnt.sc/pPSJjndgNY1K> that's just my login but it's just a black page unless you do something secret

I want to be able to send and receive cmd/powershell commands as in see the output. Can you help me brother? Direct me with chat gpt at least?

Instruct GPT to provide you the code for the applications functions.
