Thread: [1 Custom Section Design \(HTML/CSS/JS\)](#)

Hackers - June 19, 2023, 5:54 pm

It has been 2 months since I posted this & included it in my signature. I am closing this.

Spoiler [\(Click to View\)](#)

I will create 1 free section design in HTML/CSS/JS. Simply reply here with what you would like for a design and why you deserve it.

It should have at most 1 bg image / 1 featured image, a headline/sub or pre headline, and copy. Depending on the type of website section, I can handle animation but up to my discretion on that one.

I'll provide the finished code to you in a .zip with the files (index.html, styles.css, index.js, assets/fonts, etc.). You can then use it on your existing website or for whatever you want. If you want your section to match an existing site please provide link or screenshot in your reply.

In 1 month from post date I will pick a winner - I will give it to the user who's use for the design is the most interesting to me, and within my skillsets.

Here is an example of a very simple animated section:
