These days there is no e that send it from someone's else's number without getting a hold of their phone. Back in the day you could spoof from any number

**SnowCode** - August 9, 2023, 10:18 am

You most likely cannot have an SMS spoofer as the security on Spoofing has increased substantially over the past years. You can call spoof, though.

**packwork** - August 20, 2023, 1:43 pm

I know how to sms spoof and I do it daily, contact me on telegram @packwork
