Thread: [Need help finding owners name of twitter account and website](#)

paintballssting - June 20, 2023, 10:37 am

Anyone able to help me find out the owner of a specific twitter account and website?
Thanks in advance

John Hawkins - June 21, 2023, 3:57 am

I would start by the basic tools, for example, who.is for domain check.

Thank you, I had tried this and they have identity protection on their domain and address leads to PO box..

The way I see it, you can approach this from two angles. You can either dox them and compile confirmed info. Or you can play process of elimination.

Comb their twitter for clues about who they are. Commonly used emojis, times they're likely to post, language.

Approach the website as a tool to scrape info about them. Maybe contact the hosting company with a bogus request.

Can I ask what your situation is? Why do you need this info? If it's a good cause I'm willing to help.
