Thread: [Is there a tool to host bot lobbys on MW2?](#)

SVJ - June 20, 2023, 2:45 pm

Hey guys so i see these people hosting bot lobby's on MW2 and trying to figure out how they do it. I saw some guy say they use bot nets with AFK scripts but i'm not sure if that's true or even possible.

Do they use a tool or just multiple consoles? Would appreciate some advice on how to host them.

Thank you for your help!

They will just be using multiple consoles.

how do you think they keep the bots moving tho?

I would personally avoid it since every cheater that has cheated in mw2 has been getting banned regularly.

From what I've seen, most people just have multiple consoles or maybe using VMWare. It's most likely multiple consoles and using a rubberband to keep them moving. Only seen it once by accident in Vanguard from an enemy.
