Thread: [How to people host bot lobbies on MW2 2023?](#)

SVJ - June 21, 2023, 12:21 pm

Hey guys so i see these people hosting bot lobby's on MW2 and trying to figure out how they do it. I saw some guy say they use bot nets with AFK scripts but i'm not sure if that's true or even possible.

Do they use a tool or just multiple consoles? Would appreciate some advice on how to host them.

Thank you for your help!

Rionxee - June 21, 2023, 7:07 pm

I'm not sure honestly, since all this cross-platform stuff now it wouldn't surprise me if they're using VM's. Could be I'm wrong and in Asia they have rooms full of playstations and xbox's set up but it seems like it would be difficult. Probably some type of VM with VPN's and who knows what else they have to streamline everything.

I joined one early MW2, they have playstation 4s all setup. I'm sure you could use VMs like in CSGO to vertigo boost, but who knows.

they could be using a devkit as well as the other options listed above

GruntStyl - June 24, 2023, 5:07 pm

back in the day there was a tool you downloaded that would force host a lobby and people would connect to you. That's how I remember doing it back in the day. I used to host 10th prestige lobbies all the time for friends until it got patched.

Those all ran on either Devkits (which get bricked the second you turn them on) or JTAGGED Xboxes which most have been sold and phased out by now + hardware banned although I do still have a Jasper JTAG 360
