Thread: [\[W\] CSGO Skins, balance, pins, keys up to 93% Buff](#) [\[H\] Crypto, Paypal](#)

**akbasemre1** - June 22, 2023, 12:39 pm

I am buying any skin up to 93% buff value. I will pay in crypto USDT and Paypal.

Buying wallet balance and Genuine pins. I did many trades here and many other places about 6-7 years back but left. I got back recently. I am gathering the genuine pin collections as my biggest priority. Some rates to understand how much I pay.

Balance 60%

For anything mid/high tier play skins I will pay up to 93% Buff.

ST High tier knives are not collector items even though a lot changed this didn't changed. Rates are low for them even if they are high tier. Don't get disappointed

Anything under 10\$ like cases agents etc. 45-50% steam market.

Who cares about MM? I left it in 2016 and solely play ESEA/Faceit. I will give it a try with the CS2 releases, and we will see. Skins are completely independent from the game, so it doesn't matter whether you play or not. :)

CSGO player base is all time high right now. Even before CS2 was announced, it was on the rise.

yeah MM is kinda still same. but there are other options like Faceit, esea etc. for better quality MM.
