hello to all I present myself in a few words I am 31 years old and soon 32 and I am handicapped so financially I earn almost nothing and therefore I had my first portable pc at my 14 years old and since roof this time I metrize downloading everything and anything but I had heard of hacking and the darknet but it didn't appeal to me more than that and I have a friend who made a lot of money with lke darknet and he liked me to explain how it works and that by being careful you can earn large sums and I have set myself the goal of becoming a good hacker I really want to get ahead of myself and I just moved a few days ago and my old one girlfriend kept all the furniture and I have to redo my whole jaw with an implant and there are between 30 and 50 thousand euros more to buy all the furniture and household appliances, sound, stereo, new mobile phone and a good gaming pc and retake my driver's license because I got arrested too many times so they took my license away and I bought a car and lots of other stuff and so I set myself 81,610 euros for a year to motivate myself it's 6,800 euros per month and 227 euros per day so I'm super motivated to become a good hacker like you, thank you very much and see you later
