Thread: [\[VOUCHED\]STAKE STRATEGY - \\$300 PER DAY WITH ONLY 1 LTC INVESTMENT](#)

SashaBeliy - June 25, 2023, 1:12 pm

Hey everyone !

I'm offering my Stake Strategy which made me over \$300 in a couple of hours with only 1 LTC deposit.

The strategy is extremely safe and profitable.

I've used only 1 LTC to play with and made nearly 4 LTC in 6hours

You can use this strategy daily (I recommend cashing out your profits every 30 minutes-1h, this is personally the way I'm doing it but you can also let it run for hours and hope for the best)

You can do the strategy with balance less than 1 LTC too.

The strategy is very good for making profits and it wagers nice amounts in the same time so you can also enjoy your VIP perks.

Take on mind that this is gambling, there is nothing guaranteed and you should only deposit money you can afford to loose. I had great run with the strategy and I told it to my friend who also deposited 1 LTC and made 3 LTC profit in nearly 4 hours.

Price of the strategy: \$80

I will also show you other ways on how you can make extra money on Stake

If you for some reason loose your balance on your first run, I will give you my stake.us method for risk-free passive income which I sell at \$200 for free !

No, my strategy doesn't increase or double your bet after every loss until you hit.

Is this the method that uses one specific game and only that one game in order to exploit something in said game?

It uses one specific game only but its not an exploit.

Is this autopilot, what odds are we talking of losing it all?

It's autopilot but I recommend going to PC every 30-45 minutes and vaulting the profit.

So far the strategy is extremely safe.

Just by looking at the graph, it is clear that you have employed the Martingale strategy.

Please god guys. Realize that this is just another shit method that will inevitably lose you money.

Blackshadow 6.0 years later. Cringe.

Thanks.

When did I said its guaranteed ?

I stated that this is gambling strategy and nothing is guaranteed and told it to my customers.
This is for people that want to try their luck and potentially make some money.

It's taken close to a week... If you're not from germany or Norway you need to pay for a VPN. Then make a further payment to get someone to verify a stake account.

Not worth the hassle, imo. Based on the strategy he sent me it looks martingale related but I'm not a gambler so can't confirm. Probably works though, money can be made gambling if you have proper risk management.
