Thread: [QuantumChecker || The #1 OSRS Account Checker || PROXIES INCLUDED! || Up to 30K CPM!](#)

LucasKumiega - June 26, 2023, 11:31 pm

Welcome to the latest and greatest OldSchool RuneScape checker on the market, QuantumChecker!

About us:

Here at QuantumChecker, we noticed a gap in the market which current checkers were unable to facilitate.

Fortunately, our team has a combined experience of 30 years in the sector and we were able to utilise this not only by bringing the fastest checker to the market, not only the most stable checker, but also the most remote checker. We wanted something that you could start remotely, something so simple you could do it all from your mobile phone, even on a night out. You really can't rival the ease and outrageous computing power available at the tip of your fingers. Not only have we delivered and packaged the fastest checker available, our packages also include access to our pool of 50,000,000 residential rotating IP addresses, making account locks a thing of the past!

What makes us the best OSRS Checker on the market?

We, at QuantumChecker, know how much of a pain it can be to try to find a legitimate, well-made checker for your needs and then on top of that having to find good proxies to stop account locks while still maintaining good CPM. Well we've decided to combine the two. QuantumChecker comes WITH high quality proxies which will help you hit the CPM you're looking for while reducing the chance of your accounts getting locked! That is just one of the many reasons why QuantumChecker is the new market leader when it comes to OSRS Checking. Other features include:

Say goodbye to system resource worries! With QuantumChecker, you can offload the strain of checking accounts to our powerful Discord bots.

Seamless user experience is our priority. Just upload your account list to our approved hosts and paste the link into the QuantumChecker bot, it's as simple as that!

Prepare for unmatched speed! QuantumChecker boasts an impressive 30,000 CPM (checks per minute) capability, ensuring swift results.

Check the essentials with ease. Our current output provides Username, Password, Display Name, Membership status, Ban status, Total Level, Total XP, and even detects if a player is a Moderator.

Daily updates with new features! Our customers also get a say as to what features get added in the future.

How much does it cost?

Introducing our diverse range of packages, tailored to meet your unique requirements. Whether you prefer a time-based package or a check-based package, we've got you covered.

Our current packages are:

QuantumChecker PAYG - 100,000 Checks: \$20

QuantumChecker PAYG - 1,000,000 Checks: \$99

QuantumChecker Unlimited - 3 Days: \$250

QuantumChecker Unlimited - 7 Days: \$400

Anyone interested, feel free to add me on discord to discuss: LucasKumiega#9197
(UID:1122960953894510672)

We also have some vouch copies to give out to people with rep, feel free to inquire about this before they're all gone!

UPDATE 30/06/2023: QuantumChecker now also checks the Total Value of the Bank, Inventory and Equipment for any accounts with 50 or more Total Level! This is in order to filter out Tutorial Island accounts.

UPDATE 01/07/2023: Added ability to set a minimum amount of GP to report, change minimum level to over 50 or disable bank check if required.

UPDATE 03/07/2023: Introducing Pay-as-you-Go Credit System

Using the pay-as-you-go credit system, you can top up your account and only pay for what you use.

Our previous pricing model is now being referred to as QuantumChecker Unlimited - as in, unlimited checks.

Nothing has changed in terms of what quality of service you can expect from QuantumChecker.

You can buy QuantumChecker on our [Selly Store!](#)

(Jul 13, 2023 02:59 PM)Miles Teller Wrote: [CITE](#) Vouch for Lucas and QuantumChecker. Received

a vouch copy from Lucas and I have nothing but good things to say. I was invited to the discord which has everything you need to do layed out step by step. Any issues or questions I've had I was able to message Lucas and get a response fairly quickly. Will def be purchasing a license in the future

Just so you know there is a option to bump threads at the top of your thread. 50 bytes only.

If your active posting you will earn bytes easily.

Shone - July 23, 2023, 4:26 am

I've received a Vouch Copy.

Here's my review of the product after a trial use:

Everything is as described in the sales post, or even better than advertised. I am very pleased with the checker and customer service provided by Lucas. The checker is fast, works great and is really simple and convenient to use. I would highly recommend the product to anyone who knows what they're doing. The CPM in thread is advertised as 30k/minute but sometimes I had over 40k which is amazing. This is probably one of the best checkers on the market right now and I wish Lucas and his team good luck with the project.
