Have you guys seen this ? <https://www.twitch.tv/trumporbiden2024>

I came across this channel by accident and must say this is really hilarious even for non-native english speakers.

I couldn't stop laughing listening to it for only few minutes.

The fact that they read prompts sent by chat is even funnier. Smart way to make money congrats to the developers

Well, they react to chat and new subs if i see it correctly.

I checked it few times during the day and the stream holds decent amount of viewers all the time. There is also +3000 subs at this moment.

Certainly a money making machine.

And their costs are around 500\$ a month based on their little advertising they do during the stream.

I dont really recall the exact numbers on twitch since it vary on many things and is being changed often.

But i can only guess the revenue is 5x-10x.

People that made this surely know how to passively make money.

I have check it again and it holds a steady amount of viewers interacting with the chat and sub count is only getting higher.

Mr. Robot - June 29, 2023, 7:04 pm

I wish they weren't lagging so damn much and speaking practically nonsense all the time. Its entertaining for 5 minutes but after that it gets boring when you'd think interaction with the chat would be priority but its all twat waffles, dildoes, dipshits, clueless asshats in Twitch chat and hacking into the dildo empire.

Yeah, this is entertaining for 5 minutes, but twitch audience isn't really smart.

I guess the interaction with chat and subs is what keeps it alive and bring revenue.

Still this is really unique, genius and hilarious at the same time. I haven't seen "AI" utilized that way to make money.
