there is a sqli vlulnerability in the some site.

then i have failed to retrieve table names with sqlmap in that site.

target mysql version is 4.x.

i have no proper way yet.

if anyone has that way, please send me PM.

There will be proper remuneration.

thank you.

I wouldl like to take a look at the site.

Mysql Version 4.X doesn't have information schema table exist so you can't retrieve it directly.
Requires another way if not mistaken.
