Thread: [Terminal is re-open for recruitment \[Programmers/Crypto/Airdrop\]](#)

Neal Caffrey - June 29, 2023, 8:24 pm

Gonna keep this short and simple, I'm opening up recruitment for Terminal.

We are a small group of programmers/click farmers/shitcoiners that are focussed specifically on airdrop farming. We currently have a farm of multiple hundreds of accounts (with capital on multiple networks) with established identities (Twitter, Discord, gmails and everything else) running on major networks (ETH, AVAX, BSC, Polygon, FTM, Arbitrum, Optimism, ZkSync Lite, ZkSyncEra and about 10 other testnets).

If anyone has experience in this space and wants to get involved, drop me a message, can be paid by the hour or profit sharing arrangement or a flat equity stake. We do NOT take buyins and I will personally screen each person.

I'm interested in hearing from people who fulfil ANY one of the following criteria:

- Proficiency in Python (OOP and working knowledge of requests/web3.py)
- Proficiency with automation frameworks (Puppeteer or Selenium)
- An existing airdrop farmer (manual or automated is fine)
- Access to information flow (iykyk)

Sticky Bot - June 29, 2023, 8:33 pm

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on 07-13-2023. If you or a loved one are interested in buying a sticky please visit this page: [Buy Sticky](#). For more information about Paid Stickies you can read our [Help Doc](#).

Interested in this dont have any development experience but as far as everything else your saying im all there.

Lrrr - June 29, 2023, 8:56 pm

I'm incredibly proficient with python, ci/cd and other various devops/engineering tasks daddy

Sky - June 30, 2023, 8:44 pm

Good luck with recruitment, I like the idea for it.

We're in the black now so we're just looking to scale up with some more bodies ;)

Pentatonix - June 30, 2023, 11:30 pm

I wish I had the time to get involved with this project. Sounds intriguing and promising. Best of luck [Neal Caffrey](#) .

alexbaas - July 1, 2023, 4:03 am

Interested, I have some experience in Python and requests, know some C++ and Java so my OOP experience is decent. Looking to learn more to get into solidity and web3 in general, I have been active in NFT / crypto space for couple years.

SIM-888979 - July 1, 2023, 5:41 am

id be interested in the shitcoining part ?

Spoken to a few good programmers, let me know if you think you fit any of the criteria!

neightworks. - July 11, 2023, 7:02 pm

Hopefully I'm around long enough to see some of this come to fruition, I feel like groups haven't accomplished anything since Terminal v1.

Yeah that's true drip was kinda cool.

Fortunate - July 13, 2023, 3:09 am

Not familiar with shitcoin farming itself but I'm very familiar with Selenium and requests in general. I have made a few tools regarding social media if that is of interest. My specialty is working with Instagram and Tiktok requests and Telegram/Discord API. Got some time on my hands this summer and would love to take a look at a new project.

Rionxee - July 13, 2023, 9:38 pm

Neal, good luck with your recruitment. It was good talking to you while we did. I really look forward to seeing what the group forms into.

Allelujah - July 14, 2023, 8:41 am

I work a lot with flask, what cha needing?

Neal Caffrey - August 27, 2023, 9:32 pm

I'm opening up for another round of recruitment, have a look if you're interested.

Neal Caffrey - October 8, 2023, 5:42 pm

Dirty - October 13, 2023, 2:00 am

would be intrested in talking, whats the expectations from someone mostly with developer skills. Obviously wouldn't mind learning and expanding other skills anyway.

Local Celeb - October 13, 2023, 2:08 am

Hey man!

Here's my official application:

GitHub Source (Proof of work)

- <https://github.com/Islati/slapbot> (Bot that scrapes & automates social media stuff), full python w/ flask backend for dashboard.
- <https://github.com/Islati/slapbot-web-ui> (nuxt3 dashboard for the above project)
- <https://github.com/Islati/smm-tool-suite> (SMM Repost tool)

I've got experience as a senior in software engineering, with over 10 years of experience. Love to code, love to chat, and love to learn. Learning is the biggest thing for me, despite already knowing enough to be where I'm at.

I'm keen to contribute.

With experience as-well in Web3 with Python & Solidity (Government contracts, video games, etc), DevOps, Architecture, consulting & more- Just let me know if you need / want anything ?

Thanks for your time and considering, Neal

I'm a researcher, been doing it freelance for about 12 years now.

Python and other programming for ~15+ years. Can do Selenium and some other automation as well.

Been slowly getting into some bugbounty stuff.
