I'll take the final vouch copy. I'll be happy to test it out. Thanks!

Qrlebal0 - July 24, 2023, 11:33 am

Do you have retarded hands and feet solved? It would be great if you have like 1 or two free generations on the website just so it can be tested out before buying.

illusiveaon - July 24, 2023, 4:49 pm

Looks cool , would love a vouch copy.

Creativo - July 24, 2023, 7:02 pm

If you still got a vouch copy I'll do a detailed review since no one else has posted one, Let me know

Yes, most times it does well with hands and feet. Create an account and DM me your account ID (it's on the settings page) and I'll add a trial to your account.

Thanks OP for giving me one day trial. Its good service for someone that doesn't know how to set up stable diffusion locally. I personally know how to use it so its not at all confusing for me but someone who never encountered Stable Diffusion will have hard time understanding all the options on the frontend so I would say maybe you should make it simpler for people that just wanna generate images (Have some general preset) and maybe have a toggle button (Like Expert mode) that lets user see all the options.

Here are the results:

A prompt: "Long Blonde Haired White Female With Brown Eyes Wearing White Skirt Running On A Bed"

Results: <https://imgur.com/a/rggggnrD>

A prompt: "Short Black Haired Asian Female With Brown Eyes Wearing White Jacket Smiling In A Room At Night"

Results: <https://imgur.com/a/RdYLVKf>

A prompt: "Short Blonde Haired Hispanic Female With Brown Eyes Wearing White T-shirt"

Results: <https://imgur.com/a/6tJXezl>

This are just first generations but if you spend some time in it and learn how it works with a bit of patience, trial and error, you can produce some really good looking images.

I see some issues with hands, I suggest you add some LoRAs/embeddings to your negative prompt, there are ones to improve the hands. Adding a keyword like 'solo' would probably also help with the issue of it generating multiple people.

Would be awesome if you can suggest me some settings that can solve issues with hands I will be happy to upload new results here ?

Or even better make some tutorial or FAQ regarding common problems and settings that solve them. It would boost your sales and improve the product a lot for sure.

I was given a free trial to review and DesireAI has truly amazed me with its ability to create stunning imaginary of women. It's simply impressive how well the app generates various body parts. From facial features to hairstyles, and even down to intricate details like clothing, the results are consistently striking.

The clarity of the images are very good as well.. Each generated picture appears sharp and well-defined, making it hard to believe they're entirely AI-created. Expertise with Image Generation AI prompting undoubtedly plays a significant role in achieving your desired results so some experience with DALL-E or Mid Journey prompting will help..

I highly recommend this app to anyone looking for cheap endless ewhoring images of women.
