Thread: [Good trust factor / I hate google 2fa](#)

Hypixel - June 30, 2023, 8:46 am

Hey

I'm thinking on upgraded to L33T

I saw some people posted some pictures of other's users trust factors and I have to say

I travel a lot, my registered IP wont much my original, I'll always be changing IP on the go and I'm gonna turn country lock on.

As for the 2FA, I Saw only G2F available? I hate google so much, I even have a de-googled phone. Which ain't gonna work. Will it be possible to use my email instead?

Anyway, how to maintain a good trust factor? Any tips?

Yes, I know, I have 1 month 10% warning

?

Cheers

I think mine is setup with Authy. Don't pay too much attention to the trust scans. It's a nice feature but it doesn't mean a whole lot.
