Just wanted to write that it's back after so many years.

The nostalgia is real & my taco bell addiction is gonna return

I was crazy for Taco Bell when I was 8 years old and living in the USA but then I went to another country and amazingly we just got Taco Bell in my area a few years back and I think my area is only one of about three places in the country with Taco Bell. But I have no idea what Volcano Menu is? Please tell me.

Volcano menu is the "lava sauce" they have / add to their items. The lava sauce (imo) is the best tbell sauce I've ever tried.

They discontinued the lava sauce in like 2013, temp brought it back in 2015 and now its back for a limited time again & it tastes just as good as before.

I remember in 2013 i used to love that lava sauce & search it up every other year via nostalgia

& it finally came back which is mind boggling to me
