Thread: [Finally successfully cracked it, giving each person 500 bytes as a gift](#)

Lukasi - July 4, 2023, 10:02 pm

This thread has no bad inducements, just a story, only for communication and learning

A website for a scammer company, after a month of learning, I can connect to the company's WiFi and access the router's management backend. I can turn off the network firewall, and I have set up a remote port for the public IP to access the router management panel through the public network.

I used tools such as Metasploit and Ferret sidejack to sniff out the accounts and passwords of some employees' computers, as well as some cookie data from the website. I have already installed a raspberry pi at the scammer company so that I can access the raspberry pi remotely at any time?

At present, I have not successfully obtained database access permissions, What do I need to do next to achieve a successful invasion? Through RAT? Everyone can interact in the comment section

Everyone who replied to this thread. No matter what content you reply to. I will give each person 500 bytes for free as a token of gratitude (Still limited to the top 50)

Jakal - July 4, 2023, 10:36 pm

Thanks for hosting this. Your bytes were very lucky. I lost it all due to my fault though.

Secrets - July 4, 2023, 11:53 pm

Would love to have some free bytes, good read at 3AM. Good luck on the next step!

enigma125 - July 5, 2023, 12:00 am

Good work mate, RAT them take pictures and expose.

Lukasi - July 5, 2023, 12:23 am

I have completed sending the bytes of everyone above

Gambit69 - July 5, 2023, 1:38 am

I would recommend to rat em and sniff everything you can.

Lukasi - July 5, 2023, 2:18 am

(Jul 5, 2023 01:38 AM)Gambit69 Wrote: [\[CITE\]](#) I would recommend to rat em and sniff everything you can.

Bytes have been sent, I have sniffed a lot and am still learning

Hungry4Knowledge - July 5, 2023, 2:29 am

Would be interesting to hear what kind of scam do they run.

Do you do this to have a Robin Hood moment or became victim of their scam and you are in revenge mode?

Either way, I'm well impressed.

DoggyKong - July 5, 2023, 2:46 am

i would love to get some bro <3

Koyote - July 5, 2023, 2:57 am

Sounds very complex! I wish I fully appreciated the amount of work that went into it and what it all actually means, but I'm still very much entry level, so I'll be following this to learn and see where it goes. Sounds like you've done what needs doing though, so it'll be entertaining to see the progress for sure.

Lukasi - July 5, 2023, 2:59 am

Either way, I'm well impressed.

I am learning penetration technology?

StuffSneak - July 5, 2023, 3:01 am

I don't need them Bytes. Please pass them along.

However I wanted to congratulate on getting that done successfully. What kind of scam were they doing by the way?

Lukasi - July 5, 2023, 3:03 am

(Jul 5, 2023 02:57 AM)TheCuriousCoyote Wrote: [\[CITE\]](#) Sounds very complex! Sounds like you've done what needs doing though, so it'll be entertaining to see the progress for sure.

I am still learning and only know some basic operations, but I am not yet able to achieve successful intrusion

(Jul 5, 2023 03:01 AM)StuffSneak Wrote: [\[CITE\]](#) I don't need them Bytes. Please pass them along.

However I wanted to congratulate on getting that done successfully. What kind of scam were they doing by the way?

Thank you for your reply. Currently, I have not successfully hacked into the database. Just cracked the router account and sniffed some data

4871405418 - July 5, 2023, 3:40 am

Are they one of those refund scam operations? Wouldn't it be best to try and shut them down as soon as possible

dickhead - July 5, 2023, 5:06 am

Thats some great work! nothing worse than some bum scammy company!

TOM - July 5, 2023, 5:37 am

Good Job man , As long as ur intentions are whitehat and not malicious good to go :)

Peffer - July 5, 2023, 5:39 am

Nice work, buddy.

Yes, you might need to infected their computer with RAT with Vnc remote features. To access the database you need access into their server computer.

HunT3R09 - July 5, 2023, 6:31 am

Posting here for the free 500 bytes, thanks

jbran - July 5, 2023, 6:40 am

I wish I understood more about this sector and how impressive your accomplishment really is. Regardless a win is a win. Congrats man

SashaBeliy - July 5, 2023, 6:45 am

Congrats bro, once again you are being really generous to the community.

Thanks in advance for the bytes !

milw0rm - July 5, 2023, 6:51 am

Sure I take some bytes, thank you!

VKNS - July 5, 2023, 6:54 am

Congratulations mate.

Many thanks in advance.

Neil - July 5, 2023, 6:59 am

Congrats homie,

Id love my 500 bytes

trojohn - July 5, 2023, 6:59 am

Great work so far brother. Keep us updated!

Evading - July 5, 2023, 7:02 am

Bing chilling bro, good work!

DaChosenOne - July 5, 2023, 7:09 am

Congratulations dude

Thanks in advance

Lukasi - July 5, 2023, 7:15 am

Everyone above. Bytes have been distributed

DashPHP - July 5, 2023, 7:41 am

Damn that sounds insane what you've been up to.

Good job for getting this far. Gl on getting the DB!

OMSPK - July 5, 2023, 7:54 am

Damn good on ya brotha! Stopping scammers one company at a time. Keep up the good work!

Lukasi - July 5, 2023, 7:56 am

(Jul 5, 2023 07:41 AM)DashPHP Wrote: [\[CITE\]](#) Damn that sounds insane what you've been up to.

Well, that made me giggle. LOL

Bastille - July 5, 2023, 10:09 am

A scammer company ? What kind of scam ? What country ?

If it's true, congrats buddy

When you say "after 1 month of learning", you mean you didn't know hacking and learned in one month ? Or you mean 1 month of recon ?

Thanks for the bytes ! Keep us informed

Pochino - July 5, 2023, 10:40 am

Dude is scamming scammers. WIN WIN

Lyrice - July 5, 2023, 10:48 am

As mentioned above, "scamming scammers" - I respect that!

simtastic1 - July 5, 2023, 11:19 am

you're always giving out bytes...

let me have some gangy <3

Zombie [?] - July 5, 2023, 2:27 pm

Would love to get those bytes :)

Scrubspoo - July 5, 2023, 2:55 pm

I will take your money kind sir.

SIM-5296365 - July 5, 2023, 3:02 pm

Good job taking down the scammers we appreciate you

Deany - July 5, 2023, 9:58 pm

Oh wow I'd love 500 bytes for free! Thanks for doing this bro!

Prettykitty - July 5, 2023, 9:58 pm

Nice accomplishment, I commend you for that.

F3NT - July 6, 2023, 12:43 am

Good work considering what you have done so far. Keep this thread updated as I am a little intrigued, as I'm sure others are as well, haha.

Hackoo - July 6, 2023, 12:47 am

Have a nice day for everyone !!!
???

Hahaha - July 6, 2023, 2:13 am

some extra bytes would be nice

MaliciousPacifist - July 6, 2023, 2:31 am

Interesting. You've gone full Mr. Robot on them.

Why rat and dig tunnels when you are the real admin? Fuck it. Go extreme. Time for custom firmware. No reset buttons, nothing.

Are you going white or black hat on that? I would be interested in reading your story. Keep up. If you get stuck, bored what ever, consider Jim Browning them

Lukasi - July 6, 2023, 2:52 am

(Jul 6, 2023 02:31 AM)MaliciousPacifist Wrote: [\[CITE\]](#) Interesting. You've gone full Mr. Robot on them.

Bravo, bravo, bravo. This is what I often also try to do and accomplish with any scams that are sent my way. How have you intalled a pi at the company? Have you breached their physical security as well? Do they use 2fa for their employees? There's plenty of ways this can go depending on how they're setup.

MoneyAsPainkiller - July 6, 2023, 9:28 am

I like the idea, thanks for bytes

schnap - July 6, 2023, 11:04 am

There is never enough of bytes (:

Shadowking9830 - July 6, 2023, 6:26 pm

Wish I could help you more, but I would just say to rat them. Good luck on the journey OP.

B3A - July 6, 2023, 11:16 pm

pretty decent graditute

Kolgaste - July 7, 2023, 2:28 pm

Congrats! You did good ;)))

HunT3R09 - July 7, 2023, 2:34 pm

Congrates bro glad you did.

YoungWiston - July 11, 2023, 6:57 am

I need bytes bro, thanks for your time :)

HunT3R09 - July 11, 2023, 7:58 am

glad you made the crack my friend.

WebArt - July 11, 2023, 9:57 am

good luck for your next step. can i get free bytes?

yaredo - July 12, 2023, 6:32 am

awesome would love some bytes, thanks man

MarkZ™ - July 12, 2023, 4:45 pm

Hey, that is nice ;) keep it up.

Also did you check LOG4J, SQLI, BLind and not or router injections.
Those are common fail that those engenieers makes.

Like the tp-link worth a 5k.

Whole data. pass everything.

On a .txt that a keep alive could download .

So . check the dumb stuff first. those arent far away from being insecure,

Matrice-hex - July 13, 2023, 2:03 am

Good work mate. Thumbs up !

RexRurn - July 13, 2023, 11:42 am

I would RAT them for sure. Good luck buddy let everyone know about them!

Eyll8976 - July 15, 2023, 5:41 am

Sorry for misunderstanding.

You tell that you can't get full access to database, but your don't share with us what type of database is this, so it will be hard to give a a answer.

But I am think, like, if you're on the network of the company, and you able to sniff the traffic and get password form all the employees, so maybe one of the employees/Administrator get access to the database, and you want to use his password and username to concert to the database.

also, if someone is communicating the database, or if the database is located on the network of the company your own, that's make the work more easily than you think.

all that you need is the ip of the machine that the db is installing on, and you maybe able to nmap the machine to get more information about the service of the database, find exploits / attacking by arp spoofing to get the credentials

also, you can run on the whole network nmap to get much information about the operation systems and services that runs on the machines running on the network.

If they scammers also use old op, like windows 7, windows xp, there is something calll "eternalblue" that able you to interact to them machine with only ip.

Also you can dns spoofing,

you need to provide more information about what you have got, to get more details answer

Lukasi - July 15, 2023, 7:09 am

At present, I have not successfully obtained database access permissions,What do I need to do next to achieve a successful invasion? Through RAT? Everyone can interact in the comment section

Everyone who replied to this thread. No matter what content you reply to. I will give each person 500 bytes for free as a token of gratitude(Still limited to the top 50)

I am happy for you op and the lucky 50 people who posted after you. You can try successful invation through multiple methods such as RAT, Stealer, Session Hijacking etc. I am not very experienced but as far as I believe the RAT is the best option.

A website for a scammer company, after a month of learning,I can connect to the company's WiFi and access the router's management backend. I can turn off the network firewall, and I have set up a remote port for the public IP to access the router management panel through the public network.

I used tools such as Metasploit and Ferret sidejack to sniff out the accounts and passwords of some employees' computers, as well as some cookie data from the website. I have already installed a raspberry pi at the scammer company so that I can access the raspberry pi remotely at any time?

At present, I have not successfully obtained database access permissions,What do I need to do next to achieve a successful invasion? Through RAT? Everyone can interact in the comment section

Just out of interest was the database external, internal or within some CRM system

Foreigner.HF - September 14, 2023, 2:11 am

How Did you installed raspberry pi ?

Physically or remotely ?

Lukasi - September 15, 2023, 5:50 am

Install locally and then access remotely.

princessmayhem88 - September 15, 2023, 6:18 pm

I have the same question, so I will be actively following this thread.

Helpernumber1 - October 27, 2023, 10:39 am

Is it available still?

Crowned - October 27, 2023, 10:41 am

I'm quite late, but wanted to congratulate you. I'm interested to know if you managed to access the DB by now. (Not interested in bytes)

Handsome Hawk - October 27, 2023, 11:01 am

nice work, totally rat them all

Covid19 - October 27, 2023, 2:16 pm

lol i suppose I am super late to the party haha.. good luck in your endeavors you sound like youve gotten quite far. any update since starting this thread?

Did you check if cookies worked on your end?

dragl - October 27, 2023, 5:46 pm

is this still going ? would love some updates.

i could really use some bytes to buy material to learn

TheRyan - February 1, 2024, 12:03 am

Bit late but the bytes would be much appreciated.

From what I gather you have network access without specific PC access, with admin permissions via network can you not add your own host? On top of its what I'm thinking those scam centers are normally all on shared local network.

Try a JDB on a newbie even lol.
