Buying mid/high tier cs:go skins.

Pricing depends on skin, anywhere from 60%-85%

Most payments methods available, very high tier skins we can use a middleman for, mm fees through you.

Pm onsite or on discord.

Benefits are instant payouts, not having websites create subsets of your data to sell, & payment methods/options that are not typically available, etc.

Not good enough? Go sell to a website.

Are you serious? 60% ? I wonder what kind of skin would you offer 60% on.

Well, he offered me 85% buff on high / midtier so I guess that's just shark... but very weird one as sharks are mostly people with very very high reputation.

Sites pay 90-95% buff ?
