Thread: [VPS Giveaway | Pulse Servers | USA, UK, CA | Instant Unmetered DDoS Protected 2 Gbps+](#)

Tekkie - July 5, 2023, 6:24 pm

It has been a while since Pulse Servers has had a social presence, so I thought a giveaway was in order.

The next 20 upgraded members to post on this thread will receive one of our "Linux Four" servers for one month at no cost.

If you would like to continue service with a higher or lower package, we can do that with no downtime. I will also apply a recurring 10% discount.

Information about the servers and the company can be read in my sales thread, which is located in my signature. These servers can not be used maliciously.

Here's a recent speed test from one of our servers:

banonkiel - July 5, 2023, 6:27 pm

If I'm applicable to the giveaway, I would like one.

No malicious intent in using it, will be using it as sandbox for testing some nodejs apps (won't be abusing anything)

LEGENDAVIE - July 5, 2023, 6:27 pm

I would like to test this out, I'd love an Ubuntu located in USA if possible

I'll check it out, I want to test some IPFS integrations from two different servers so this'll work. I'm assuming we can SSH in and use cli?

I'll take any Ubuntu vps if you have one, preferably on v18 or 20+ Its
