\$700 will get you 500 envelopes and 500 index cards with whatever you need written on it. Shipping is included into the price. I can provide as much as you need. Cards will not be inserted into the envelope.

If you don't know why you would need this, I'll explain how this can turn into about a 2.5x investment for \$100. Most people on here know what I'm talking about after all the rodent sellers started popping up when I stopped selling the method here.

Taking crypto, apple pay & zelle only.

Any warranty if rejected?

No warranty. It's a simple handwriting service. But I'd like you to know that after sending over 500,000 envelopes across many, many accounts, none have been rejected for machine writing. You're more likely to get 3.3'd at this time anyway since they just like to nuke accounts now, assuming you're talking about VGW.

3.3'd? That one clause right in most terms ?
