? Mask Your Phishing Links | The Ultimate Social Engineering Toolkit ?

This tool allows you to discreetly mask phishing links or URLs behind authentic ones. With the capability to execute social engineering attacks, the tool ensures versatility in manipulating various URL types, including ngrok links. Users will find this tool incredibly valuable and user-friendly, with its intuitive interface resembling that of Metasploitable 1 and Metasploitable 2. This lightweight bash script provides flexibility to meet your specific requirements.

Features:

Conceal Phishing Links:

Seamlessly blend phishing links within genuine URLs using our tool's advanced hiding techniques.

Link Transformation:

Transform phishing links into ordinary web addresses, resembling popular platforms like Google or YouTube.

User-Friendly Experience:

Enjoy the simplicity and ease-of-use provided by our tool's intuitive interface.

Lightweight Solution:

Benefit from a compact and efficient tool that optimizes storage space, without any unnecessary bulk.

Bash Language Implementation:

Our tool is expertly crafted using the bash programming language, ensuring reliability and versatility.

half of this website are leeches and byte farming robots.

either they don't reply, or take the method and fuck off.

don't care, not a real issue. people will still purchase it lol.

Stanley - July 19, 2023, 3:13 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

topuser - July 20, 2023, 10:09 am

dannyboy0 - December 22, 2023, 8:56 am

interesting will try it.

anonymouswsx - December 24, 2023, 8:20 am

thanks.....

seojinlover12 - February 14, 2024, 2:34 am

Thank so much bro I appreciate your tool

ddoxerbastart - March 18, 2024, 7:20 am

Interesting...

i try now

Restinpeso24 - March 19, 2024, 5:23 pm

Guess im gonna have to buy some bytes xd

niquitot4 - March 20, 2024, 11:46 pm

Damn this is expensive, wish I had the bytes tho, can anyone vouch if these methods here are cool and still working?

tru3 - April 2, 2024, 6:53 am

Thanks for u sharing

Cl0udy. - October 24, 2024, 3:00 pm

Does this tool still works?

snebb - November 3, 2024, 1:07 pm

nice method. what about using taplink?

G-DillahKillah - November 3, 2024, 3:21 pm

Since the OP hasn't been around for over a year, I didn't see a point in letting people shell out bytes to a dead account. So I half-ass automated a github tool that does the same thing. The requirements will automatically install themselves so all you need is python and git and you should be good to go! Let me know if you have any trouble running it.

----Virus Total Scan----

----Python Script----

Code import time

import os

os.system("sudo apt install pipenv")

os.system("pipenv run pip install termcolor")

os.system("pipenv run pip install colorama")

os.system("pipenv run pip install ascii_magic")

os.system("pipenv run pip install pillow")

import colorama

from colorama import Fore

import subprocess

from colorama import Back

import re

import sys

import subprocess

import termcolor

from termcolor import colored

from time import sleep

from PIL import ImageEnhance

from ascii_magic import AsciiArt

def ascii_banner():

```

try:
    my_art =
AsciiArt.from_url('https://i.postimg.cc/Jhbhr2hT/Screenshot-2024-04-21-at-05-13-59-e21459f801968
8f030e3fd2ddf70830b-jpg-JPEG-Image-338-600-pixels.png')
except OSError as e:
    print(f'Could not load the image, server said: {e.code} {e.msg}')
my_art.to_terminal()

def clear_screen():
    subprocess.run('clear' if os.name == 'posix' else 'cls')

def main():
    ascii_banner()
    print(colored("Starting LinkMask", "red", attrs=["reverse", "blink", "bold"]))
    time.sleep(3)
    os.system("pipenv run git clone https://github.com/technicalheadquarter/linkmask")
    os.chdir("linkmask")
    os.system("git fetch")
    os.system("git pull")
    os.system("sudo chmod +x linkmask.sh")
    os.system("sudo bash ./linkmask.sh")

if __name__ == "__main__":
    main()

```

dnnn12 - November 4, 2024, 1:52 am

hey its still work in 2024 ?

lindxdd - November 5, 2024, 3:37 pm

Seems to be pretty good, and interesting. Thanks!

hackermenace247 - November 9, 2024, 4:09 pm

Thank you I will save up 250 bytes since I used to use social engineering with a amazon fake gm ail account to try to get people to give me there login info and it works but a second layer with phishing will help cuz it will seem like its actual y legit coming from amazon
