If it does, it is a 0day exploit and will likely fetch 500k+, much more if RCE crit.

Don't be fooled by someone attempting to sell you the world for a bag of apples.
NOT REAL

Extension spoofer will work for this from .exe to .rcs.jpg, about silent exploit for image formats? Nah
you only will get scammed

You are the kind of person to fall for an image rat and any other too good to be true tools. Please if
you're looking to get into the realm of infecting people at least do the BARE MINIMUM and
EDUCATE YOUR SELF.
