Thread: [Sentinel MultiTool | Announcement](#)

Eclipse - July 12, 2023, 12:29 pm

Introducing Sentinel MultiTool. An upgraded version of the original Sentinel Binder!
the shining gem of all tools
Binding Files have never been Secure.

Now merged with a loader! Along with some new features,

+New Remote Loader

- Allows The User to have complete Control of Events of the binded files
- Fully Customizable. Every setting creates UNIQUE output which makes it more UD
- Change How would the output work
- Loader has access to SECURE encrypted binded files ONLY the loader can decrypt and give reverse enginners a hard time!
- Traffic is redirected through Tor & Proxy AND the connection is end to end encrypted ssl/tls

+New Advanced Plugins System

+Extension Spoofer

+New Custom Code

- Now Each part of the Tool is FULLY customizable with Custom Code and as visualization there is a graph each Module [Feature] Can be added and wired together how you want!

This gem will be released for the public with a monthly fee of 35\$ OR Lifetime which costs 135\$
Stay tuned for more. We are releasing soon

Also Sentinel Binder customers will receive a copy of the multi tool, the old application will still work but will not be updated.

berserk3r - July 17, 2023, 2:44 am

Your preview product was bad and I could never use it due to binding issue and never fixed lol paid 50\$ for some thing weak. And any time I were contacting you regarding the issue you always told me hold on! doing updates...do you know for how long I waited and now you talk about another product!

Thanks

Eclipse - July 17, 2023, 4:16 am

??? ?????????.

Just a quick warning: this seller is a child and previously sold "undetected" products here, which turned out to be scams, and when people complained, the seller simply closed the post. This user is unable to write their own tools, and I recommend you avoid them due to their past behavior as a skid.

Hey,

i dont even know you, i never closed any threads i do not know what are you talking about.

if you had issues u could simply report it to me or my partner

Also u just joined yesterday.

And you are a new member. i didnt sell anything to you

??? ?????????????? ???, ???, ??? ? ??????-????? ??????, ??? ?? ?????????? ??? ? GitHub ? ?????? ?
????????????????????? ?????????????.

You used to know me under a different alias.

I recently joined because the private forums I was using were closed.

I never bought anything from you, but you gave me a copy of your "FuD Dropper" to test, and it didn't work. Then you blamed it on a Windows update and called me a liar.

When other users complained, you closed the seller's page and took their money.

You are a child who goes by the name Eclipse, you've been using that name on Discord for a few years now. All I've ever seen you do is steal code from GitHub and lie about undetected products.

and i dont sell a dropper, and i respond to every issue

and how is that stolen from github...

Hello,

There is a misunderstanding you are speaking to the wrong person we never closed any threads our thread is still open, I am the main developer and I have never worked or coded a FUD Dropper product Our only product is a Binder, The only test\vouch copies we gave out was for HF members only so if you have received a copy from us that means you are on an alt HF account that is not allowed here, so we did not give any test\vouch copies on discord or any other forums. I don t understand why sale trash before doing any research who you really talking to, My colleague's discord name was never Eclipse and also In this thread we stated that "BEWARE OF IMPOSTERS. WE ONLY POST LINK IN THIS THREAD ONLY." so you might spoke to a totally different person or a scammer impersonator who wanted to scam you. To us your are speaking total none sense right now.

Root Joy - October 18, 2023, 10:25 am

So there is no one that have used this tool. Your video did not even show ur tool. Well mmmmmmm

aliye01 - October 27, 2023, 11:50 pm

Caution: This seller, who is a minor, has a history of offering supposedly undetected products that turned out to be scams. When confronted with complaints, they promptly closed their listings. Given their lack of skill as a scripter and past conduct, it's advisable to steer clear of this seller.

Eclipse - November 3, 2023, 12:10 am
