Delete ".txt" from the end of the file I've shared and drag the .key file onto the WinRAR window and it should activate.

Thanks, it worked! Appreciate being able to get rid of that annoying window.

Hopefully it does, it's an unlimited key so hopefully they WinRAR doesn't catch on.

Just use 7zip. It's free, better and open source <https://www.7-zip.org/>

StuffSneak - July 13, 2023, 2:00 pm

People still use WinRAR? Please use 7-zip. Much better option.

<https://www.7-zip.org/> I tried 7zip didn't like it.

kenchan223 - July 13, 2023, 7:34 pm

It works, thanks!

Also, I tried 7zip before but it was confusing and It just wasn't for me.

Shadowking9830 - July 13, 2023, 8:08 pm

Thanks a lot. Worked perfectly.
