Do you guys only focus on one pack and one snapchat etc with ewhoring or run multiple different packs with different snapchats etc at once? (Was just wondering and thinking about if people manage multiple at once and if that's a better option)

yes just once. talking is too hard with more than one and it lowers income.

Best thing to do is experiment you try to multi task and experience it yourself which best works for you

It works the best when you have one great pack and you stay with that one. Staying with just one profile helps you remember your "story" better and it also helps you build credibility.

Do you have any tips for social engineering? I feel like I'm just bad at this, idk how soon I should start asking for payments or how to subtly finesse it into the convo. Any help would be much appreciated ?
