Thread: [Antivirus bypass FUD builds 0/26 Antiscan.me | Crypt your payload](#)

Depp - July 14, 2023, 6:52 am

This is how it works:

1. Send me your payload
2. Pay me \$25.
3. I send it back completely FUD (use antiscan.me or others that don't distribute)

Selling a custom builder for \$200.

- I can make almost anything completely FUD. If its not fud, I will rebuild it until it is fud.
- It works with any executable
- I do not use .NET or related libs. the result will be native
- Every crypt is unique.

Giving 1 vouch copy.

It depends on what your payload does.

It is not a crypter, it is a personalized service. I examine your payload and determine the best steps to make it FUD. It is still scan FUD at the moment, and up to 90% run FUD, but it depends on your payload.
