What is looks like:

*It lags a bit thats because of the video

The code:

*I've used as timer interval 50. You can change it to what ever you like.

I've saw this in a video and I thought I can do that to, so I did it.
Have fun.

Didn't really look at the code, but I'm glad you did it as a picture and not a C+P block. Nice one :)

Code is dead, could you perhaps reupload it somewhere else like imageshack.us? They don't delete their pics. Thank You!
