Is Warzone advice good advice to start with? Which crypter should I use to make the stub fud? I am considering whether I should buy Warzone Rat or not.

You can take a look at <https://hackforums.net/showthread.php?tid=6227378> which is less known. It has only basic features, but has not been abused yet.

You can also take a look at free and open-source RATS:

Dc RAT:

<https://github.com/qwqdanchun/DcRat>

Async RAT:

<https://github.com/NYAN-x-CAT/AsyncRAT-C-Sharp>

Quasar:

<https://github.com/quasar/Quasar>

And regarding crypters, you should do your own research like this:

Generally private, manual crypts are the only viable option nowadays.
