Thread: [LF HIGHLY EXPERIENCED WEB/APP DEVELOPER](#)

crown - July 24, 2023, 7:18 am

hi there,

I'm crown, I'm currently seeking for somebody with more then average skills - clean background - and looking for a clean source of income.

I'm specifically looking for a talented SQL/App Developer, I personally can carry the web portion myself.

What would you be doing? - You'd be on payroll for a legitimate company, you'll be making an Android/IOS Application that serves a specific purpose to storefronts.

I want someone that knows what they're doing, you'll be making a push notification web service, a whole cross-compatible application.

Pay will be talked about, once you know the project and see it you can meet demands. You're expected to be available from Monday to Friday 10am-7pm. This is a Job, not just a once and done gig.

If you're feeling like you can make this happen reach out to me, I'll be vetting every response.

Thank you,
crown.

Hello, I'm interested. I'm comfortable with React Native and have worked with numerous flavors of SQL. I'm open to learning other frameworks as well if you're using something like Flutter/etc. I can also make your time commitments.

Contact me via discord is best: __scary (2 underscores)

Matrice-hex - July 24, 2023, 7:31 pm

Hit me up if you are looking for WebApp Developer as well.
Thanks & Regards

elipheleh - July 26, 2023, 1:50 pm

Hi I am excellent in SQL and PHP, JS etc.. basically web techs... And I am open to work with you.

I can also pick up mew frameworks and or languages easily as the job requires.

Contact me on Telegram: @elipheleh or Discord: elipheleh_
