If you were established in 2018 then why is your domain registered just 4 weeks ago?

Honestly, my guess is you're a scammer. You already have a huge lie right in your description.

Also your email @hostersy.com.... the domain isn't even registered. WTF...

Hello,

We have our own datacenter from 2018 in Paris, but we just started selling spoof and bulletproof servers right now.

If you need some proof come in PM or write on telegram.

The mistake on the email is because we have copied the format from another thread, fixed. Thanks for the report

We can offer TRIALS for everyone!

Then if you started in 2018, under what domains are you running your business.

See, it's not uncommon for scammers to start a service like yours. Take money for hosting, then close shop and disappear.

So how about you start posting evidence of your 2018 business. I'm the site owner. I'll just close your account if you don't. Not fucking around with something I see as obvious thread to the members.
