Thread: [Investment Opportunity - Google Workspace - Super Admin](#)

Maxorg - August 1, 2023, 7:01 pm

Google Workspace Super Admin Account available for purchase. This can be used for companies that need email accounts for their employees or someone that wants to sell individual accounts to turn a profit.

Highlights:

Create up to 10,000 users

Unlimited Gmail & Drive Storage

Add-on domains

Collaborate in real-time with Docs, Sheets, Slides, Sites, and Jamboard

Communicate virtually from anywhere with Google Meet, Chat, and Gmail

Stay ahead of data loss prevention for Gmail and Drive

No monthly payments (Lifetime)

User Management: Super Admins can create, modify, and delete user accounts within the Google Workspace domain. They can also reset passwords, manage two-factor authentication, and control user access to various services.

Email Management: Super Admins have access to email settings and can configure email routing, spam and security settings, and manage email quotas and restrictions.

Data Security and Compliance: Super Admins can enforce security policies across the organization, control sharing settings, set up data loss prevention (DLP) rules, and manage audit logs for compliance purposes.

App Deployment: Super Admins can control which applications are available to users in the Google Workspace Marketplace, and they can deploy and manage third-party apps for the organization.

Organizational Units (OUs) Management: Super Admins can create and manage OUs, which allow them to apply different policies and settings to specific groups of users within the organization.

Device Management: Super Admins can manage mobile devices and Chromebooks used by the organization, including applying policies, restrictions, and remotely wiping data if necessary.

Google Drive and Docs Management: Super Admins can access and manage files in users' Google Drive accounts if necessary, especially in cases where data access is required for investigations or compliance purposes.

Google Workspace Services Configuration: Super Admins can control which Google services are available to users in the organization and configure settings for various services like Google Meet, Google Calendar, Google Docs, etc.

Group Management: Super Admins can create and manage Google Groups, control group settings, and add or remove members from groups.

Security and Alerts: Super Admins have access to security settings, including configuring alerts and notifications for unusual account activity and potential security threats.

Price: \$3,500 USD

It's an interesting service but what guarantee that it will stay lifetime without issues? Like you could sell this and in for example 2 years it's fucked?

I've had these for 3 years or so without issues. As long as you stick to the TOS of Google, you would be fine.

If you are selling accounts and users are violating terms, you will be notified and have the option of suspending them without any harm coming to your account.
